CALL FOR PAPERS

Abstract Submission
for ETCC2020 European Technical Coatings Congress
taking place on 2-4 September 2020 in Krakow (Poland)

The congress venue is Auditorium Maximum of the Jagiellonian University established in 1364. This historical city, known since the 7th century, is UNESCO World Heritage Centre and shows many historical facilities, buildings and museums.

Please submit the abstract of your presentation; lecture or poster.

Important dates:
- Abstract submission, deadline: 30 January 2020
- Notification of abstract authors: 30 March 2020

For detailed information please visit: www.etcc2020.org/en/congress/application-docs

The ETCC2020 presentations will refer to the latest scientific and technical achievements for: paints, coatings, printing inks, construction materials, and adhesives

2–4 September 2020, Krakow, Poland • www.etcc2020.org
Topics of papers in this range include e.g.:

- Advances in science of paints, coatings, printing inks, adhesives and construction materials
- Polymers and other raw materials usage
- Products and process legislation
- Chemical composition and products specifications
- Environment, safety and health issues
- Progress in processing and production
- Equipment and production lines
- Application methods and application equipment
- Measuring and testing, quality systems
- Thermal and weathering degradation of paints and coatings

ETCC2020 is one of the most prestigious and most important technical and scientific events, creating a platform and a meeting point of industry and science, represented by companies, institutes and universities. During the three days of the event there will be plenary presentations and 3 – 4 parallel sessions, poster presentations, as well as an exhibition. Experts representing the largest manufacturers, their suppliers, institutes, and universities across Europe as well as other countries worldwide, will be giving their presentations.

A seminar “European Summer-School Coatings and Colourants” with lectures dedicated especially for young scientists and students forms a part of the congress. Another remarkable plus point: The annual lecture meeting of the German Paint Chemists’ Association (GDCh, Division of Paint Chemistry) will be integrated into the ETCC Congress 2020, for the benefit of both individual events.

So the congress opens up great opportunities for international co-operation and of collecting unique knowledge about the newest materials, products, processing, equipment, research and testing. Those presentations will be published in journals, mainly such with a high impact factor.

Krakow is the leading centre of science and art, with 23 universities and 200 000 students. Krakow is very easily accessible by plane (flights from the majority of European Airports), motorways (at the crossing of West-East and North-South) and by trains.

The congress has 70 years of tradition!. Since the year 1950 FATIPEC regularly organises scientific and technical congresses. In 2012, the existing traditional “FATIPEC Congress” was continued with the now well-known name “ETCC – European Technical Coatings Congress". As FATIPEC took over the management of the Global Federation CSI – Coatings Societies International (www.csi-coatings.org) - it will support the involvement of specialists of our working area from around the world at ETCC2020.

Should you have any questions, please do not hesitate to contact:
Maria Zielecka - Chairperson of the Congress Scientific Committee: mzielecka@cnbop.pl
Jozef Koziel - Chairperson of the Congress Organising Committee: koziel.jozef@gmail.com
